

Hadi Alidoustaghdam

Wireless Systems/RF Engineer

Electronic engineer

(+31) 685314014, hadi.alidoustaghdam@gmail.com

Profile

- Wireless systems and RF engineer with strong knowledge in signal processing, wireless communication, and sensing systems.
- R&D experience in microwave circuits and antenna design.
- Extensive experience in electromagnetic simulations, product development, prototyping, and proof-of-concept measurements.

Work Experience

R&D electrical engineer, Ultrasonics Aug 2025-
Allseas Engineering, Eindhoven, Netherlands

- Nondestructive testing of oil and gas pipelines with phased array ultrasonic.
- Algorithm development and signal processing.

PhD Researcher, Communication & Sensing Sep 2020-Dec 2024
University of Twente, Enschede, Netherlands

- Developed system-level models for 6G wireless networks.
- RF front-end design for joint communication and sensing in mmWaves.
- Signal processing for monitoring human vital signs by mmWave radar.

M.Sc. Researcher, Microwave Imaging 2018-2020
Istanbul Technical University, Istanbul, Turkey

- Worked on signal processing and implementation of microwave imaging techniques.
- Focused on breast cancer detection, through-the-wall imaging, noninvasive diagnostics using microwave technology.
- Antenna design for wireless capsule endoscope system.

Microwave Network Engineer 2016-2018
Huawei, Tehran, Iran

- Designed and implemented tailored solutions for network expansion and optimization, focusing on enhancing performance and meeting customer requirements.

Details

Date of Birth: 08.05.1993

Gender: Male

Address:

Weert, Limburg

Core Competencies

- Wireless system design
- Radar algorithms
- RF/EM Simulation
- PCB Design

Technical Summary

RF/ Microwave

- RF Circuits/Antennas
- EM/microwave simulation
- Broadband Design
- EMC, EMI

Singal Processing

- Communication systems
- Imaging Algorithms
- Non-destructive testing

CAD Tools

- Ansys HFSS
- Altium Designer
- MATLAB
- Keysight ADS
- CST Studio

Certificate

- Google Project Management Certificate

Education

PhD in Electrical and Electronics Engineering, **2020-2024**
University of Twente, Enschede, Netherlands

Thesis: Joint Communication and Sensing, Array antenna design.

M.Sc. in Telecommunication Engineering **2018-2020**
Istanbul Technical University, Istanbul, Turkey

Thesis: Qualitative Microwave Imaging Inside Metallic Cavity, GPA: 3.86/4.0

B.Sc. in Electrical and Electronics Engineering **2011-2016**
Iran University of Science and Technology, Tehran, Iran

Thesis: Multilayer Passive Microwave Switch, GPA: 3.75/4.0

Skills

Technical skills

- Comprehensive expertise in RF/microwave design, i.e., filters, antennas and amplifiers.
- In-depth knowledge of inverse problems, qualitative and quantitative imaging using microwave technologies, SAR, ISAR, and radar systems.
- Proficient in CAD tools, electromagnetic simulation, and PCB design.
- Hands-on experience with RF/microwave measurement techniques and instrumentation.
- Programming skills in MATLAB, Python, and C++.

Management skills

- Problem-solving and troubleshooting skills with experience in complex challenges.
- Strong communication and collaboration abilities, with a capacity to work effectively both independently and within team environments.
- Excellent technical documentation and presentation skills.
- Skilled in budget and timeline management, supervision and leadership skills
- Expertise in requirements analysis, model-based systems engineering, risk management.

Language Skills

Native in Turkish and Persian

Fluent in English

Intermediate in Dutch

Hobbies & Interests

- Painting, art galleries, cinema.
- Reading (Art and Philosophy).
- Sports (Running and gym).
